Allowable Subject Matter

1. Claims 1-21 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. Regarding claims 1, 9, and 17, The prior art of record considered alone or in combination neither anticipates nor renders obvious a dual band RF tuning circuit comprising: a first impedance element and a second impedance a switching transistor being switched on and off by changing its bias voltage, a band control voltage source connected to the switching transistor to change its bias voltage, and the switching transistor having conducting gates connected to the second impedance element to short the second impedance element, which tunes the tuning circuit by the first impedance element.

The prior art of record provided numerous teachings of RF tuning circuit. However, the prior art of record failed to specifically disclose a band control voltage source connected to the switching transistor to change its bias voltage, and the switching transistor having conducting gates connected to the second impedance element to short the second impedance element, which tunes the tuning circuit by the first impedance element.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
